FULL STACK DEVELOPER

Professional programmer with experience developing web applications throughout the SDLC (Software Development Life Cycle). Successful teamwork and increased business efficiency with good practices, reusable code, and up-to-date documentation.

WORK EXPERIENCE

CONAPE (Consejo Nacional de la Persona Envejeciente)

Full stack developer (March 2022 – present)

- I contributed to improvements in the performance and reusability of the code by implementing CFC (ColdFusion components) to handle the back-end logic instead of using regular ColdFusion Markup.

- I contributed to the migration from ColdFusion (Adobe) to Lucee (Open Source).

HARPER SRL

Front End developer (December 2022 – present)

- Create quality mockups and prototypes.

- Create reusable components for an internal library to maintain an uniform UI.

- Collaborate with back-end developers and web designers to improve usability.
